8 from one lot

After the reporting of the SID cases in Tennessee, we discussed the merits of limiting distribution of a large number of vials from a single lot to a single state, county or city health department and obtained agreement from the senior management staff to proceed with such a plan.

This subject has been discussed with Charlie Young and the following guidelines were developed by FSRD. I would appreciate your comments concerning this procedure and the advisability of formalizing these guidelines.

Interim Measures in Effect

1. Allocation of stock to Distribution Centers is designated by lot number in a manner designed to leave the maximum variety of lot numbers in Great Valley and Marietta to service substantial orders.
2. Managers in D.C.'s carrying average inventories of over 2000 packages (approximate) have been requested to advise FSRD of any orders exceeding 2000 vials. FSRD will then designate shipment by lot number, furnishing additional stock as needed.

Permanent Policy Proposal

1. A D.C. will not fill any order with stock exceeding 2000 packages of one lot number before clearing with FSRD.
2. When additional stock is needed for compliance, FSRD necessary arrangements.
3. In the event that the national inventory does not permit compliance, FSRD will clear exception with Marietta management arrangements for split delivery.
