

AIDS – the Big Fraud

A crime on a governmental level

Since April 1984 the Aids-virus-lie has been going all around the world. It has led to thirteen international AIDS conferences. The AIDS researchers had to admit at the 14th AIDS conference in Barcelona, Spain (July 2002) and up to now that there is only a great confusion. For eighteen years now a tiny little lump of genes (HIV; 9 kilo bases) seems to be leading by the nose all virologists, genetic engineers, doctors and AIDS-researchers. But as AIDS is only a phantom (a construct) and HIV does not exist, there will **never** be any results in the form of medicine. Therefore, the whole of AIDS research is **100 % superfluous!** And the billions which have been spent up to now is money down the drain. The panicmongering in respect to a non existent HIV infection has caused an incredible amount of damage to human beings and society.

Because there ist not only one HIV-infected human being all over the world, it is high time to get rid of AIDS!

One thing *most* of the researchers, pharmacists, Public Health services, doctors, politicians, churches, media and AIDS help groups withhold from you, is the **AIDS criticism.**

The AIDS critics say:

1. 29 conventional diseases are renamed AIDS (A.I.D.-Syndrome), i.e. **labelled wrongly !!!**
2. One does **not** catch these diseases by an infection with (the non existent) HIV !!!
3. These diseases are - in contrast to the Aids-lie propaganda - curable !!!
4. The so-called HIV is non existent, it has never been isolated, it is only a phantom !!!
5. Therefore, HIV has nothing to do with AIDS; a non existent virus can never be the cause of a disease which does not exist !!!

Just as you should not believe in the AIDS lie, you also should not uncritically believe everything that AIDS CRITICS say; but, if you are interested in the topic, you should investigate it. To give you an opportunity to do so, here are some suggested works which are withheld from you by the official strategy of silencing the critics:
